Not directly a Web3 tool, but HavelBeenPwnd allows you to check if your email has been compromised.

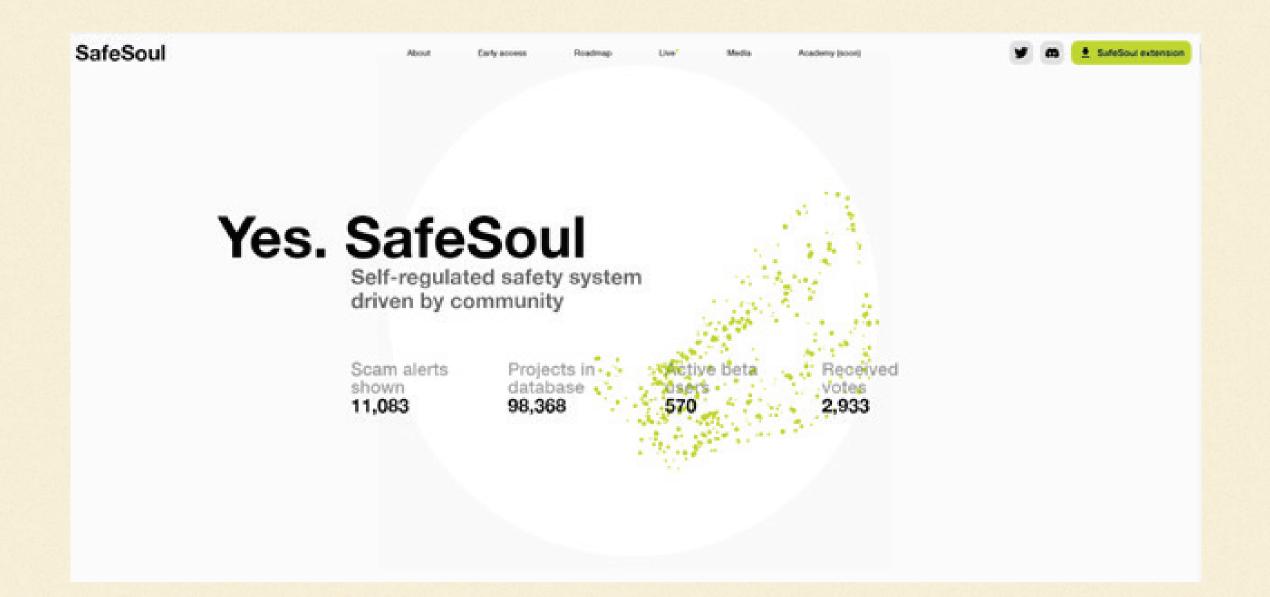

2. Web3 Antivirus

Web3 Antivirus is a security tool that helps you keep your crypto assets safe against scams and fraud

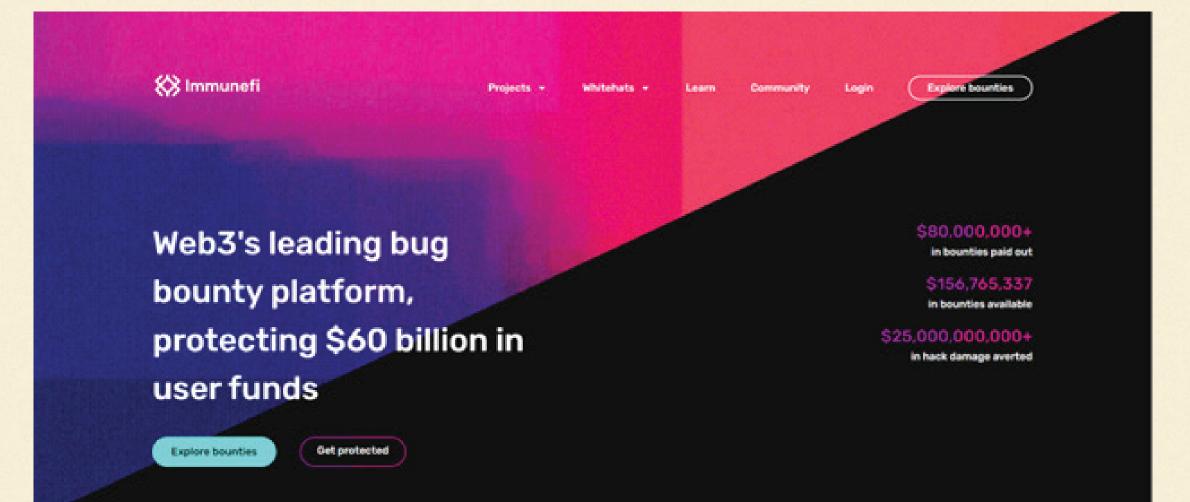

3. SafeSoul

Free browser extension integrated into Twitter alerts you to scams and suspicious activity in your feed. Immediate safety check for any open page: project on OS, scammed website etc.

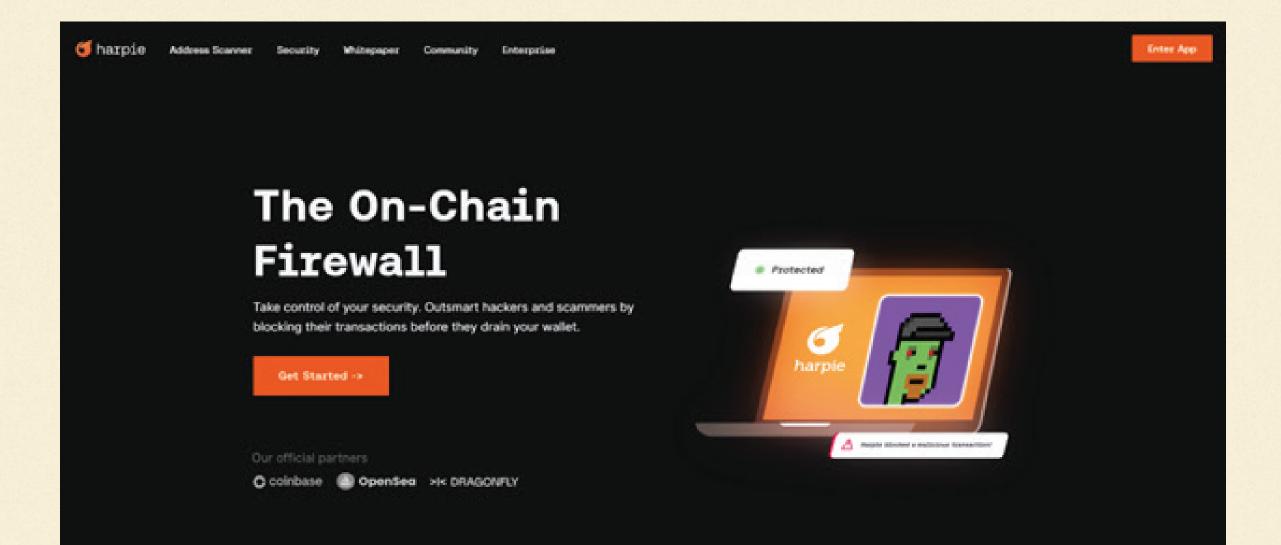

4. Immunefi

Web3's leading bug bounty platform, protecting \$60 billion in user funds

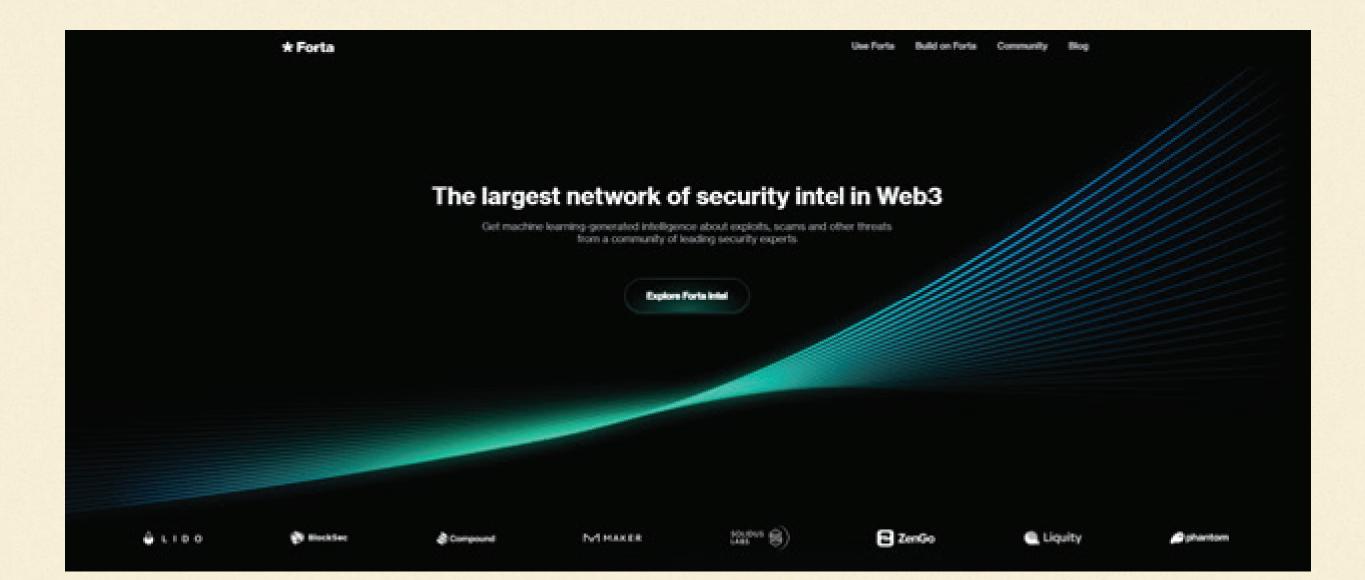

5. Harpie

Harpie is an on-chain firewall that protects users from hacks, scams, and theft.

6. Forta

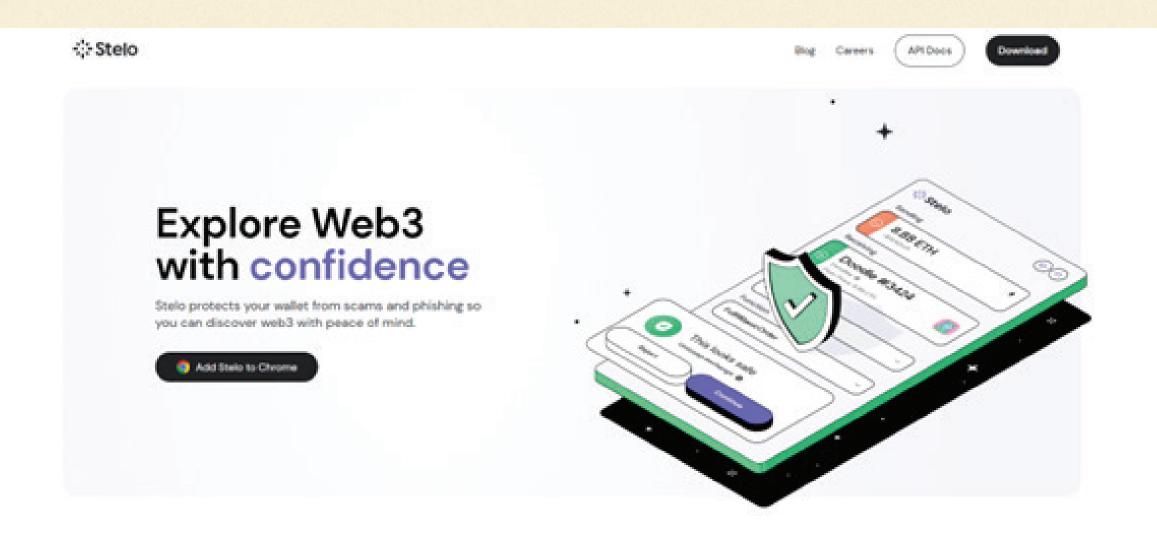

Forta Network is a decentralized monitoring network designed to detect and address Web3 threats and anomalies in real-time using machine learning

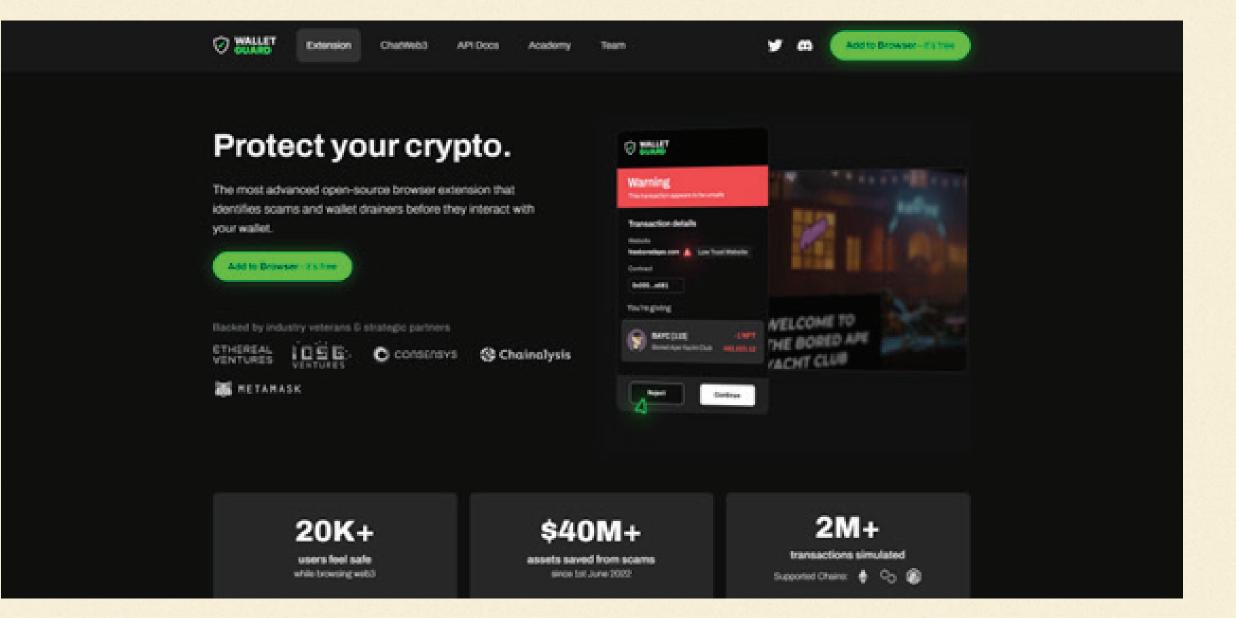

7. Stelo

Stelo simulates every transaction before it reaches your wallet and explains what's happening in plain English

8. Wallet Guard

Wallet Guard is an advanced web3 security extension featuring transaction simulation and proactive phishing detection

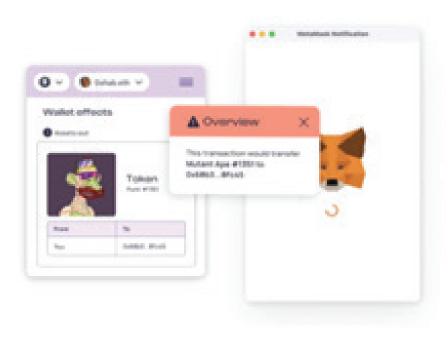

9. Fire

BFIRE Blog Howit Works Team Join Us FAQ

Feeling unsafe transacting on web3? You're not alone.

Fire is a free extension that simulates web3 transactions, showing you exactly what will enter and exit your wallet before you sign the contract. All under control with your current wallet.

Add to Chrome (it's free() >>

SUPPORTING 🚯 ETH, 🍓 POLYGON, 😑 OPTIMISM, AND 🥱 ARBITRUM ON CHROME, FIREFOX, AND BRAVE

Fire is a free browser extension that simulates web3 transactions, showing you exactly what will enter and exit your wallet before you sign the contract.

Take Back Control of Your Wallet.

When using dapps like Uniowap or OpenSea you have to grant them permission to spend your tokens and NFTs. This is called a token approval. If you don't revoke these approvals, the dapp can spend your tokens forever. Take back control by revoking your approvals.
